3. marts 2023 Antrow Software Announces the Migration of LibreOffice and Apache OpenOffice databases to a Web App

Antrow Software is pleased to announce that they now offer the migration of LibreOffice and Apache OpenOffice database applications to a web app. This means that businesses and organizations can now take advantage of the many benefits of cloud-based software while still retaining the functionality and familiarity of their existing productivity suite.

With the rise of remote work and the need for collaboration across multiple locations and devices, the transition to cloud-based software has become increasingly important. However, many organizations have been hesitant to make the move due to concerns over compatibility, security, and cost.

By migrating LibreOffice and Apache OpenOffice to a web app, Antrow Software provides a solution that addresses all of these concerns. Users can access their documents from anywhere with an internet connection, collaborate in real-time with colleagues, and benefit from the security and cost savings of cloud-based software.

The migration process is seamless and involves no downtime or disruption to your existing workflow. Antrow Software works closely with each client to ensure that the migration is tailored to their specific needs and requirements. The end result is a web app that is fully customized to your business and optimized for performance and security.

So if you're ready to make the transition to cloud-based software and take advantage of the many benefits that come with it, contact Antrow Software today to learn more about the migration of database applications LibreOffice and Apache OpenOffice to a web app.
